

Run your primary school
not the system

integris^{G2}
a new school of thought

Designed to be flexible

Integriss^{G2} is the only school Management Information System (MIS) designed specifically for Primary Schools. The system includes as standard all the modules needed to run your school:

- School Administration
- Classroom Attendance
- Behaviour Manager
- School Census Return
- Assessment Markbooks
- Assessment Analysis
- School Report Manager

Integriss^{G2} has been designed to help you 'run your school, not the system'. We've designed our MIS to be simple and easy to use, reducing your workload and giving you extra time in your day.

RM is the leading provider of ICT software, infrastructure and services to UK education. Thousands of schools already use our school management solutions and Integriss^{G2} is now the fastest growing school MIS in the country.

Supporting your school

No more upgrades

Your MIS needs to keep up with DCSF data requirements, but that is no reason to increase your work-load! Integriss^{G2} is upgraded automatically on your behalf outside of school hours. Applying software upgrades are a thing of the past.

Keep your data secure

We know how important it is to back-up your school data for that 'just-in-case' scenario, so Integriss^{G2} takes care of this for you. No tapes, disc or USB stick required (and the data is stored securely off the school premises).

Manage school attendance

With access from the classroom, why not get your Teachers to take the register online? With data already in the system the school office can then follow-up non-attendance much quicker than ever before. You can also take advantage of mobile technologies by integrating with an attendance messaging system to send parents text messages, improving the safety and security of pupils.

No system maintenance

Should you really have to worry about an MIS server? Switch to Integriss^{G2} and no administration server is required. You can save time, your school can save money.

Instant, secure access

Access the system from any computer in your school with Integriss^{G2}. All you need to run Integriss^{G2} is the internet browser already installed on every computer on your school network.

Easier reporting options

Integriss^{G2} offers a wide range of standard reports for you to choose from. Can't see what you're looking for? Use the ad hoc reporting tool to create your own report. Save it and share it with colleagues at a click of a button!

Your school can choose to switch to Integriss^{G2} and receive support from your local authority or direct from RM.

“

We are a new user of Integris⁶² and are already impressed by the attendance module. The system will provide teachers with the functionality to take the register online in the classroom, updating the data immediately which will greatly improve attendance data. Reporting is very simple and quick, a very useful tool. ”

Angela Lancefield, HLTA/Pupil Welfare, Mersea Island School, Essex

“

In Integris⁶² we feel we have found an excellent web delivered school MIS that is tried and tested in over 21 Local Authorities. We look forward to using functionality such as assessment analysis to further improve our school. ”

John Dye, Head Teacher, Martham Primary School, Norfolk

“

Integris⁶² has brought in new functionality which makes our job so much easier. For example, being able to add notes in the electronic register against individual pupils makes it easier for teachers to track attendance. Also, the ability to create our own ad hoc reports is brilliant – they're easy to do and suit our own specific requirements. ”

Isil Mustafa, School Administrator, Stamford Hill Primary School, Haringey

“

Integris⁶² is amazing. It's so simple to use and it never lets us down. In SIMS we used to spend hours just doing the downloads for patches. With Integris⁶² it just happens overnight and we get a cheery note to say the upgrade was successful. Also, the Helpdesk service is second to none – answers are immediately available. I would recommend Integris⁶² to anyone who asked. ”

Kathy Lyons, School Manager, St George's New Town Junior School, Essex

The next step.
